Questions to ask every company

1. What exactly is included: removal or abandonment, and which parts of the job are covered, such as cutting, hauling, disposal and restoration?

2. How is the job priced: by job, by tank size, or a flat scope price, and what would change the price?

3. Who does the work, your own crew or subcontractors, and what permits and county notices does this job require?

4. Is this a removal or an abandonment, and what documentation or certificate will I receive when the job is done?

5. What does the written quote cover, and what would change it once work starts, such as soil contamination found during the job?

6. What soil testing, cleanup and restoration is included at the end, and what happens to the old tank and its contents?
